System Software Engineer and MIT alum with **ten years' experience**:

Linux, kernel development, device drivers, computer graphics, firmware,
video decoding, end user software, and systems administration;

Additional specialties: automotive, aviation, machining, CAD, CAM, cycling.

PROFESSIONAL EXPERIENCE

Senior System Software Engineer

NVIDIA Corporation, Santa Clara, CA and Austin, TX - 2011-present

- Member of elite team responsible for the proprietary NVIDIA graphics driver stack for Linux, FreeBSD, and Solaris.
- Technical lead - Video Decode and Post-Processing API for UNIX (VDPAU)
- Ported VDPAU to a brand new video decoder architecture.
- Added support for next generation H.265/HEVC hardware video decode to the Linux driver and to VDPAU. (See: <https://github.com/NVIDIA/vdpau-hevc-example>)
- Participate in hardware architectural reviews for video decoding hardware.
- Responsible for video post processing shaders in Cg and GLSL languages.
- Expertise in OpenGL multithreading, graphics pipeline configuration, rendering state.
- Key member of new hardware bringup process:
 - Communication with hardware, software, and chip delivery teams;
 - Prepared test plans and programs to execute on pre-silicon software and hardware emulation environments;
 - Execution of test programs on early silicon in first days of bringup
- Debug and fix critical stop-ship issues related to video decoding on GPUs.
- *Technologies used: C, C++, Python, Makefile; gcc, gdb, Linux kernel, NVIDIA GPUs, OpenGL, firmware/microcodes.*

Member of Technical Staff

Model N, Redwood Shores, CA - 2009-2010

- Member of middleware team, writing pricing, contracts, customer, compliance, and commitments support software for pharmaceutical and semiconductor industries.
- Technical ownership of key contract features in product.
- Worked with customers and management to define and prioritize features.
- Implemented customer facing features in both back-end application server (Java) and front-end user interface (JavaScript).
- *Technologies used: Java, JavaScript, Oracle SQL; Apache Tomcat, Oracle WebLogic, IBM WebSphere, Oracle SQL Server.*

José Hiram Soltren

EXPERIENCE *(continued...)*

Systems Administrator

D. E. Shaw & Co., L.P., New York, NY - 2007-2008

- D. E. Shaw & Co. is a global investment management firm located in NYC.
- Member of Systems team, responsible for all desktop, server, networking, and communications hardware and software infrastructure.
- Provided direct end user support through Systems Helpdesk rotations.
- Served as liaison between front office groups and specialty Systems engineering teams.
- Drove user requests and tickets to completion.
- Designed, and managed building of, video conferencing rooms.

COMMUNITY LEADERSHIP

Residential Faculty-Eastside College Preparatory School, East Palo Alto, CA

- Operated weekend dormitory program for high school students.

Big Brother – Big Brothers and Big Sisters of the Bay Area

- Served as friend and mentor to a young man through his formative years.

Trip Leader – Bike & Build, Inc.

- Planned and led two cross-country charity bicycle tours for young adults.

EDUCATION

Massachusetts Institute of Technology, Cambridge, MA

Master of Engineering, Electrical Engineering and Computer Science, 2009

- Course work in operating systems, biomedical informatics, network protocols, scientific computation, signal processing, power electronics.
- Wrote thesis on using Semantic Web technologies to determine privacy policy compliance of database queries using a rules-based reasoner.

Bachelor of Science, Electrical Engineering and Computer Science, 2007

- Minor in Science, Technology, and Society.

LANGUAGES Fluent in: English, Spanish, C.

Proficient in: OpenGL, Java, JS, R, C++, Scheme, Perl, Python, MATLAB, Cg, GLSL.

CITIZENSHIP United States
