SYNOPSIS

Staff Software/Hardware Engineer: from Silicon through Display to Web.
Seeking Hardware Integration, Firmware, Scientific Computing, Infra roles.
Flight Instructor - CFI/CFII/AIGI (MEI pending)
Expert in C, C++, systems, Linux, device drivers, hardware accelerators.

EXPERIENCE

Flight Instructor Soltren Consulting LLC Apr 2024 - present

- First class medical. 626h total, 518h PIC, 274h XC, 51h IMC, 125 dual given.
- Commercial pilot, single/multi engine airplane.

Connectivity Engineer ForeFlight Jan 2024 - Nov 2024

- Led third party hardware integration efforts with Tier 1 avionics platforms.
- Designed and implemented API for generic third-party avionics device integration.
- Avionics lab manager. Installed numerous avionics test benches.

Team Lead/Manager, Build and Release Roku Jan 2023 - Sep 2023

- Responsible for official build, release, and CI infrastructure.
- Led team of four to implement self-service efforts, reducing ticket counts by 30% while improving turnaround time and throughput.
- Implemented pre-merge CI, presented results at IEEE ICST 2023.

Senior Software Engineer, Roku Players Roku Jun 2020 - Dec 2022

- C++20 based firmware development with focus on video decode and multimedia.
- YouTube certification lead for HDMI player platforms.
- Firmware lead for Roku Streaming Stick 4K, a 20M unit program.

Deep Learning Software Engineer Nervana / Intel Corp. Aug 2017 - Feb 2019

- Firmware development in C++ for deep learning training hardware accelerator.
- Focus on hardware and software to run GEMM and convolution as fast as possible.
- Designed an algorithm for all-to-all data transfers on our hardware that beat the Bruck Algorithm, the fastest general purpose algorithm.

Software Engineer Cloudera, Inc. May 2016 - Aug 2017

- Fault tolerance hardening for Apache Spark. Presented findings at Spark Summit.

Senior System Software Engineer NVIDIA Corporation May 2011 - Apr 2016

- Firmware and driver development for 3D graphics accelerators.
- Lead engineer for video decode and post-processing, including hardware validation.
- Bug fix and feature work in OpenGL and Vulkan.

EDUCATION

Massachusetts Institute of Technology, Cambridge, MA
Master of Engineering and S.B., Electrical Engineering and Computer Science
Grad level operating systems course work. Build a kernel and hypervisor in C.
Lab assistant for undergraduate microcontroller/firmware course.

CITIZENSHIP

United States
